PROFILE SUMMARY - PORTFOLIO

- CS grad skilled in **Java** and **Python**, deployed **5+** web applications that address real issues in India. **Finalist** in **HackVega 2.0 Hackathon** among **45k+** participants, earned the **Knight Badge** on **LeetCode** (**650+** problems, **1844** rating), and **Elite + Gold** certified in **Data Analytics** from **IIT Roorkee**, ranking in the **top 2%** of **15k+** participants.

EDUCATION

- Jaypee Institute Of Information Technology, Noida** Apr 2022 - May 2026
Bachelor of Technology in Computer Science and Engineering Overall CGPA: **7.0**

EXPERIENCE

- Vault of Codes - Live Demo** Jul 2025 - Aug 2025
Python Programming Intern / AICTE Internship [Project Link](#)
 - Built and deployed **DoorStep**, a trust verification layer on **Google's** own **Plus Codes** system (**FastAPI**, **React**) so a delivery rider or ambulance driver can check a household's **trust score** before travelling there.
 - Designed a transparent **4-tier, 0 to 100 trust score** from neighbour vouches, validated every **Plus Code** server-side with **Google's** own **geocoding** library, and added an offline **SMS** fallback for India's largely rural population.
- Google Developer Student Club, IIIT - Live Demo** Mar 2025 - Jul 2025
Volunteer (Software Developer) [Project Link](#)
 - Built and deployed **Baadh Mitra**, a flood-relay coordinator (**FastAPI**, **React**, **PostgreSQL**) that turns a **Flood Hub-Style** alert into a ranked, door-to-door **checklist** for volunteers without smartphone reach.
 - Designed a weighted, **prioritization engine**, **7 risk factors** scaled across **4 alert-severity levels**, so elderly-only and no-smartphone households are always **flagged first**, with reasons stored behind every score.

PERSONAL PROJECTS

- Risky (UPI Risk Companion) - Live Demo** Apr 2026 - May 2026
Python, FastAPI, React, Scikit-Learn [Project Link](#)
 - Built **Risky**, a **UPI** risk companion (**FastAPI**, **React**, **Scikit-Learn**) blending a **10-rule** fraud engine with a **logistic regression classifier** to flag risky payments before the **PIN** is entered.
 - Localized every risk explanation into **7 Indian languages** with **speech synthesis** and added a cooling-off step for flagged transactions so overriding a warning never feels rewarded.
- Trustly (Neighbourhood Trust Score) - Live Demo** May 2026 - Jun 2026
Python, FastAPI, React, Pytest, GitHub Actions [Project Link](#)
 - Built **Trustly**, a review-trust scorer (**FastAPI**, **React**) running **4 explainable checks**, generic text, rating mismatches, clustered dates, anonymous reviewers, to flag **low-signal** reviews.
 - Covered the engine with an automated **Pytest** suite run on every push via **GitHub Actions CI/CD**.

TECHNICAL SKILLS AND INTERESTS

Core Languages: C/C++, Java, Python, JavaScript

Web Development: FastAPI, React, RESTful APIs, Vite, Tailwind CSS

Data and DevOps: SQL, PostgreSQL, SQLite, SQLAlchemy, Redis, Docker

AI and Machine Learning: PyTorch, Scikit-Learn, NumPy, Pandas, Matplotlib

CS Fundamentals and Practices: Data Structures and Algorithms, Object-Oriented Design, Relational Databases, Git/GitHub, CI/CD with GitHub Actions, Unit Testing, Agile Methodologies, Google Workspace.

HACKATHONS

- HackVega 2.0: Finalist** in the **HackVega 2.0 National Hackathon**, against **47,795** participants nationwide. [Link](#)
 - Aptitude and Logical Assessment:** Cleared with a **full score**.
 - Technical Coding Round:** Solved **all 3** questions, passing **all 36** test cases.
 - Advanced Live Coding Round:** Passed **8 out of 12** test cases.

CERTIFICATIONS

- NPTEL Certification:** Scored above **90%** in **Data Analytics with Python**, awarded **Elite + Gold** certificate by **Indian Institute of Technology (IIT) Roorkee**, and ranked in the **top 2%** among **15,086** participants nationwide. - [Link](#)

ACHIEVEMENTS

- LeetCode:** Solved over **650+** problems, reached a rating of **1844** (**6%** globally), and earned the **Knight Badge**. - [Link](#)
 - Biweekly Contest 160:** Achieved a **Global Rank of 1003** among **29,470** participants.
 - Weekly Contest 450:** Achieved a **Global Rank of 1451** among **26,806** participants.
 - Weekly Contest 459:** Achieved a **Global Rank of 1786** among **31,599** participants.
- Open-Source:** Found a bug in **MSVC** compiler, reported on **Stack Overflow**, and acknowledged by **Microsoft**. - [Link](#)
